		<p>Possessed of a genius level intelligence, Grace Chang graduated from M.I.T at the age of seventeen with the intention of immediately pursuing a graduate degree, but that dream was put on hold when she was recruited into G.I. Joe by Viscount. Grace then went through an extensive training program before being recruited into Viscount's Operation Snake Charmer. Grace fills a wide variety of roles for the team, allowing it to have a smaller footprint and require less operatives. She is the team's computer technician, quartermaster, pilot, and emergency field support all in one extremely capable package, though she likes to joke that it's all a bit much for a simple computer nerd. Viscount often jokes that he would lose his head without her and that she is the glue that holds the team together.</p>
