	<p>Raised by a single father who had been part of the Irish Republican Army during his youth, Siobhan MacLeod learned self-sufficiency and how to handle a firearm from a young age. During her teenage years, she herself became involved with the IRA, including participating in an action that resulted in the death of a law enforcement officer. Siobhan temporarily escaped consequences when her outstanding grades and brilliant mind earned her a scholarship to study at Purdue University in the United States. Her studies focused on autonomous drones and her work brought her to the attention of Special Division 6 Logistics. SD6L attempted to recruit her, but eventually resorted to blackmailing her over her past with the IRA to secure her services. Siobhan reluctantly became an operative and was eventually paired with Charlize Worthington and Victoria Sloane as part of a team of field operatives. When she learned that Charlize was a double agent for G.I. Joe, she began to assist her compatriot's efforts and eventually reached a deal to join G.I. Joe as part of Operation Snake Charmer to secure a pardon for past crimes including her work with SD6L.</p>
