		<p>Formerly an off-the-books assassin for a CIA black ops program known as Anger of Angels, Victoria Sloane was listed as killed-in-action by the Agency following what may have been a set-up by a Deputy Director. Recovered by SD6L, she underwent an experimental medical procedure that turned her into an advanced cyborg. Many of Victoria's memories were either lost or deliberately erased and she was retrained and then deployed into the field as a deadly SD6L operative. The mental conditioning used by SD6L proved imperfect, however, and Victoria recovered some details about her past. She became a willing ally in Operation Snake Charmer. Despite her troubling past, field operatives determined that she could be a powerful asset and ultimately Viscount made the decision to officially recruit her into G.I. Joe and Operation Snake Charmer on a provisional basis.</p>
